

Marshall Space Flight Center Exhibit Data Sheet

Space Laboratories Exhibit

The Space Laboratories exhibit spans the years of space science from Skylab, Spacelab, Space Station, and Beyond. This exhibit includes four cabinets containing artifacts and models dealing with space science. This walk-through exhibit contains photos, text, and hands-on items - many of which are actual flight or training hardware. A twelve foot theater also accompanies this exhibit featuring a "Futures" theme video.

The 12' tall theater can be used as a stand alone display.

This exhibit is suitable only for indoor use only.

Dimensions:

20' x 30'
12' tall theater - 10' x 10"

Electrical Requirements:

One 30 Amp Single Phase Drop
